

Fire Safety Awareness

Introduction

The Regulatory Reform (Fire Safety) Order 2005 states that "the Responsible Person must ensure that his employees are provided with adequate safety training". The level of training will depend on the findings of a Fire Risk Assessment.

The SSG Fire Safety Awareness Course aims to provide a basic understanding of fire and improve fire safety by raising awareness of fire prevention and precautions, including practical use of extinguishers.

Course Duration

SSG offer this course over half a day.

Who Should Attend

This course is suitable for employees at all functional levels within the organisation requiring a basic understanding of fire risk and fire control. There are no prerequisites for delegates attending this training course.

Course Programme

- Fire statistics and high profile examples
- An overview of relevant legislation
- An overview of fire chemistry (the fire triangle/classes of fire)
- An overview of fire prevention techniques including housekeeping, storage and safe working practices
- An overview of fire precautions, including fire detection, fire escape routes, drills and extinguishers
- Practical use of fire extinguishers

Certification and Assessment

Delegates will be assessed on their input during the practical exercise and their feedback. Course certification lasts three years.
