

Asbestos Awareness - Refresher (UKATA)

SSG is a UKATA registered member

Introduction

Asbestos is one of the biggest occupational health issues and kills around 5000 workers each year, which is greater than those who die through road traffic accidents in the UK. However, asbestos is not just a problem of the past. It can be present today in any building built or refurbished before the year 2000.

Course Duration

SSG offer this course over two hours.

Who Should Attend

The Control of Asbestos Regulations 2012, Approved Code of Practice states that 'Refresher training should be given regularly'. A skills analysis will be undertaken at the start of the course in order to confirm delegates attending have retained information from the original course and to ensure refresher training is sufficient. In order to achieve a UKATA Asbestos Awareness Refresher certificate delegates must provide evidence of attending a UKATA Asbestos Awareness Course within 12-18 months and can satisfy the requirements of the TNA (Training Needs Analysis).

Course Programme

Asbestos Awareness Refresher Course Programme includes project work to revise the:

- History, types and properties of asbestos
- Possible effects on health
- Locations/identification of possible Asbestos Containing Materials (ACMs)
- Relevant parts of the Control of Asbestos Regulations 2012
- Types of Asbestos Surveys
- Emergency procedures

Certification and Assessment

Delegates will be assessed by a multiple-choice assessment with an 80% pass mark. Course certification lasts one year. Successful delegates will receive a hard copy of their certificate. ID cards can be requested at an additional cost of £3.50 per delegate.

Suggested Follow on and Complementary Courses

- Non Licensable Work with Asbestos
- CITB Site Management Safety Training Scheme
- CITB Site Supervision Safety Training Scheme
