

Practical Spill Management (Half Day Session)

Introduction

Spill response is essential in ensuring protection of your site and the environment from pollution incidents. This Spill Management course is designed in partnership with NPS UK to provide your staff with sufficient knowledge about spill response to enable you to plan for and respond to incidents in your own organisation.

Course Duration

SSG offer this private course in conjunction with NPS UK over a half day.

Who Should Attend

Any person with responsibilities for spill management planning and practical spill response.

Course Programme

- Why is spill control important
- Key legislation
- Pollution pathways
- Pollution prevention
- Emergency response procedures including practical session

Spill Kits

NPS UK spill kits will be used during training. These will be provided by the client and available on site on the training day.

Certification and Assessment

Delegates will be assessed on their input during the practical exercises and their feedback. Course certification lasts 3 years.

Suggested Follow on and Complementary Courses
